TECHNICAL SKILLS

Javascript, React.js, Redux, CSS, HTML, Ruby, Ruby on Rails, Rails as an API, BCrypt, Domain Modelling, Fetch, localStorage, Git, SQL

EXPERIENCE

Flatiron School   New York, NY
Software Engineering Student   09/2020 - 01/2021

Traverse - GitHub Frontend, GitHub Backend | Demo
Traverse is a social media and all inclusive travel booking application that takes away all the stress of planning a trip.
- Built a self referencing user model and reusable components to generate a social media application
- Optimized access and tracking for user information client-side using localStorage
- Created a central data store with Redux to increase data flow control and maintain a single source of truth for components

Twumbler - GitHub Frontend, GitHub Backend | Demo
Twumbler is a private journaling application that gives a user the opportunity for emotional catharsis and regulation.
- Assembled application with Rails as an API and Javascript for user interface
- Designed 3 custom CSS themes that enable styling changes in the user interface
- Employed Active Storage to streamline file uploads and set users profile image

B@ckLg - Github | Demo
B@ckLg, a video game cataloging application that helps gamers perform an advanced search and track their video games.
- Built a RAWG Database API search functionality to pull and parse data on video games and gaming systems
- Utilized BCrypt to encrypt user information and set up authentication

Wellesley College   Wellesley, MA
IT Support Specialist   08/2018 - 12/2019
- Resolved 30 technical tickets per day, ranging from password resets to optimizing operational efficiency
- Assisted students and staff walkins with diagnosing and solving 5 technical issues per 1-hour shift
